

HB 753 -- Science and Mathematics Education

Sponsor: Avery

This bill creates the Collaborative for Applied Experiences in Science Program, which consists of a summer employment program to develop skills in mathematics, science, computer science, and engineering administered by the Division of Job Development and Training and a host institution of higher education. In selecting participants, preference will be given to successful college students who reside in Missouri. The program will offer paid work experience. Project sponsors may include, among others, state agencies and units of local government, community-based organizations, and corporations.
