

SECOND REGULAR SESSION

HOUSE BILL NO. 933

92ND GENERAL ASSEMBLY

INTRODUCED BY REPRESENTATIVES BIVINS (Sponsor), MUNZLINGER,
SANDER AND ICET (Co-sponsors).

Pre-filed December 30, 2003, and copies ordered printed.

STEPHEN S. DAVIS, Chief Clerk

3346L.011

AN ACT

To amend chapter 490, RSMo, by adding thereto eight new sections relating to environmental audit privileges.

Be it enacted by the General Assembly of the state of Missouri, as follows:

Section A. Chapter 490, RSMo, is amended by adding thereto eight new sections, to be
2 known as sections 490.750, 490.753, 490.755, 490.757, 490.759, 490.762, 490.765, and 490.768,
3 to read as follows:

**490.750. In order to encourage owners and operators of facilities regulated under
2 state, federal, regional, or local laws, ordinances, regulations, permits, or orders to conduct
3 voluntary internal environmental audits of their compliance programs and management
4 systems and in order to assess and improve compliance with those laws, and to promote the
5 prompt disclosure to the department of natural resources in order to correct any
6 deficiencies discovered, no environmental audit shall be disclosed except as provided in
7 sections 490.750 to 490.768 to protect the confidentiality of communications relating to
8 voluntary internal environmental audits.**

490.753. As used in sections 490.750 to 490.768, the following terms mean:

2 **(1) "Compliance management system" or "environmental management system",
3 a regulated entity's documented systematic efforts, appropriate to the size and nature of
4 its business, to prevent, detect, and correct noncompliance through all of the following:**

5 **(a) Compliance policies, standards, and procedures that identify how employees
6 and agents are to meet the requirements of laws, regulations, permits, enforceable
7 agreements, and other sources of authority for environmental requirements;**

8 **(b) Assignment of overall responsibility for overseeing compliance with policies,
9 standards, and procedures, and assignment of specific responsibility for assuring**

10 compliance at each facility or operation;

11 (c) Mechanisms for systematically assuring that compliance policies, standards, and
12 procedures are being carried out, including monitoring and auditing systems reasonably
13 designed to detect and correct noncompliance, periodic evaluation of the overall
14 performance of the compliance management system, or environmental management
15 system, and a means for employees or agents to report noncompliance of environmental
16 requirements without fear of retaliation;

17 (d) Efforts to communicate effectively the regulated entity's standards and
18 procedures to all employees and other agents;

19 (e) Appropriate incentives to managers and employees to perform in accordance
20 with the compliance policies, standards, and procedures, including consistent enforcement
21 through appropriate disciplinary mechanisms; and

22 (f) Procedures for the prompt and appropriate correction of any noncompliance,
23 and any necessary modifications to the regulated entity's compliance management system
24 or environmental management system to prevent future noncompliance;

25 (2) "Department", the department of natural resources;

26 (3) "Environmental audit", a systematic, documented, periodic, and objective
27 review by regulated entities of facility operations and practices related to meeting
28 environmental requirements;

29 (4) "Environmental audit report", the documented analysis, conclusions, and
30 recommendations resulting from an environmental audit, but not including data obtained
31 in or testimonial evidence concerning such audit;

32 (5) "Regulated entity", any entity, including a federal, state, or municipal
33 department or facility, which is regulated under federal environmental laws.

490.755. If a regulated entity establishes that it satisfies all of the conditions of
2 section 490.765, the department shall not seek penalties for noncompliance of state, federal,
3 regional, or local laws, ordinances, regulations, permits, or orders relating to
4 environmental requirements discovered and disclosed by the entity.

490.757. If a regulated entity establishes that it satisfies subdivisions (1) to (9) of
2 section 490.765, the department shall not recommend to the attorney general or other
3 prosecuting authority that criminal charges be brought against the disclosing entity, as
4 long as the department determines that the noncompliance is not part of a pattern or
5 practice that demonstrates or involves:

6 (1) A prevalent management philosophy or practice that conceals or condones
7 environmental noncompliance; or

8 (2) High-level corporate officials' or managers' conscious involvement in, or willful

9 blindness to, noncompliance of federal environmental law.

2 **490.759.** Regardless of whether the department recommends the regulated entity
3 for criminal prosecution, the department may recommend for prosecution the criminal acts
4 of individual managers or employees under existing policies guiding the exercise of
5 enforcement discretion.

2 **490.762. 1.** The department, the attorney general, and any prosecuting attorney
3 shall not request or use an environmental audit report to initiate a civil or criminal
4 investigation of an entity, including but not limited to the use of such report in routine
5 inspections. If the department has an independent reason to believe that noncompliance
6 has occurred, the department may seek any information relevant to identifying
7 noncompliance or determining liability or extent of harm.

8 **2.** Notwithstanding the provisions of subsection 1 of this section, an environmental
9 audit report commissioned by counsel is privileged information under the attorney-client
10 or work-product privilege, and is inadmissible as evidence in any legal action in any civil,
11 criminal, or administrative proceeding instituted by any other third party.

2 **490.765.** In order to receive the benefits of sections 490.750 to 490.768, owners and
3 operators of facilities regulated under state, federal, regional, or local laws, ordinances,
4 regulations, permits, or orders shall comply with the following:

5 **(1)** The noncompliance was discovered through:

6 **(a)** An environmental audit; or

7 **(b)** A compliance management system, reflecting the regulated entity's due
8 diligence in preventing, detecting, and correcting noncompliance. The regulated entity
9 shall provide accurate and complete documentation to the department as to how its
10 compliance management system meets the criteria or due diligence and how the regulated
11 entity discovered the noncompliance through its compliance management system. The
12 department may require the regulated entity to make available to the public a description
13 of its compliance management system;

14 **(2)** The noncompliance was discovered voluntarily and not through a legally
15 mandated monitoring or sampling requirement prescribed by statute, regulation, permit,
16 judicial, or administrative order, or consent agreement. Sections 490.750 to 490.768 shall
17 not apply to:

18 **(a)** Emissions noncompliance detected through a continuous emissions monitor, or
19 alternative monitor established in a permit, where any such monitoring is required;

20 **(b)** Noncompliance of National Pollutant Discharge Elimination System discharge
21 limits detected through required sampling or monitoring; or

(c) Noncompliance discovered through a compliance audit required to be

22 performed by the terms of a consent order or settlement agreement, unless the audit is a
23 component of agreement terms to implement a comprehensive environmental management
24 system;

25 (3) The regulated entity fully discloses the specific noncompliance in writing to the
26 department within twenty-one days, or such shorter time period as may be required by
27 law, after the entity discovers that the noncompliance has, or may have, occurred. The
28 time at which the entity discovers that a noncompliance has, or may have, occurred begins
29 when any officer, director, employee, or agent of the facility has an objectively reasonable
30 basis for believing that a noncompliance has, or may have, occurred;

31 (4) The regulated entity discovers and discloses the potential noncompliance to the
32 department prior to:

33 (a) The commencement of a federal, state, or local department inspection or
34 investigation, or the issuance by such department of an information request to the
35 regulated entity, in which the department determines that the facility did not know that
36 it was under civil investigation, and the department determines that the entity is otherwise
37 acting in good faith, in which case the department is authorized to reduce or waive civil
38 penalties in accordance with sections 490.750 to 490.768;

39 (b) Notice of a citizen suit;

40 (c) The filing of a complaint by a third party;

41 (d) The reporting of the noncompliance to the department or other government
42 agency by a whistle-blower employee and not be one authorized to speak on behalf of the
43 regulated entity; or

44 (e) Imminent discovery of the noncompliance by a regulatory department or
45 agency;

46 (5) The regulated entity shall correct the noncompliance within sixty calendar days
47 from the date of discovery, certifying in writing that the noncompliance has occurred and
48 taking appropriate measures as determined by the department to remedy any
49 environmental or human harm due to the noncompliance. The department retains the
50 authority to order an entity to correct a noncompliance within a specific time period
51 shorter than sixty days whenever correction in such shorter time period is feasible and
52 necessary to protect adequately public health and the environment. If more than sixty days
53 is needed to correct the noncompliance, the regulated entity shall so notify the department
54 in writing prior to the expiration of the sixty-day period. If appropriate, the department
55 may require a regulated entity to enter into a publicly available written agreement,
56 administrative consent order, or judicial consent decree as a condition for obtaining relief
57 under sections 490.750 to 490.768, in particular where compliance or remedial measures

58 are complex or a lengthy schedule for attaining and maintaining compliance or
59 remediating harm is required;

60 (6) The regulated entity shall agree in writing to take steps to prevent a recurrence
61 of the noncompliance, including improvements to its environmental auditing or compliance
62 management system;

63 (7) The specific noncompliance, or a closely related noncompliance, has not
64 occurred within the previous three years at the same facility and has not occurred within
65 the past five years as part of a pattern at multiple facilities owned or operated by the same
66 entity. For the purposes of this section, noncompliance includes:

67 (a) Any noncompliance of federal, state, or local environmental law identified in
68 a judicial or administrative order, consent agreement or order, complaint, or notice of
69 noncompliance, conviction, or plea agreement; or

70 (b) Any act or omission for which the regulated entity has previously received
71 penalty mitigation from the department or another state or local department;

72 (8) The noncompliance is not one which:

73 (a) Resulted in serious actual harm, or may have presented an imminent and
74 substantial endangerment, to human health or the environment; or

75 (b) Violates the specific terms of any judicial or administrative order or consent
76 agreement; and

77 (9) The regulated entity cooperates as requested by the department and provides
78 such information as is necessary and requested by the department to determine
79 applicability of sections 490.750 to 490.768.

2 490.768. The department shall make available to the public the terms and
3 conditions of any compliance agreement reached pursuant to sections 490.750 to 490.768,
4 including the nature of the noncompliance, the remedy, and the schedule for returning to
5 compliance; provided, however, that the results of any audit or audit report to the extent
6 disclosed to the department are not public records and shall not be subject to disclosure
pursuant to chapter 610, RSMo.
