

HB 842 -- Licensing of Electricians and Plumbers

Sponsor: Angst

This bill allows municipalities in counties of the third classification to license persons who perform electrical and plumbing work and to charge a fee for the licenses. The municipality may require the person who performs electrical work to pass an electrical work examination. The bill excludes electricians working for any utility or railroad from the licensing requirements. Electricians and plumbers who are employed full-time by an employer to do maintenance for the employer are also excluded.
