

## HB 935 -- Student Volunteer Opportunities

Sponsor: Moore

This bill requires the State Board of Education to encourage school districts to adopt service learning programs to foster academic achievement, civic engagement, and character development. The state board will, upon request, provide technical assistance and assistance in locating financial resources for teachers developing service learning programs and projects. These projects may be counted for credit in courses for high school graduation and may be used at any grade level to address state educational standards, where appropriate.
