

HB 1269 -- Statutory Revisions

Sponsor: Smith (118)

Under current law, the General Assembly is required to provide for the collating, indexing, printing, and binding of all session laws and resolutions adopted by both houses. This bill transfers those duties to the Joint Committee on Legislative Research. Because the bill also authorizes the production of the Revised Statutes of Missouri in an electronic format, the number of printed copies of session laws and revised statutes that are required to be distributed without charge is reduced, and a written request and format selection requirement is added for some distributees.

The bill contains an emergency clause.
