

HB 1368 -- Massage Therapists

Sponsor: Salva

This bill exempts the licensing requirements for massage therapists licensed in other states who wish to provide services in this state if their licensing requirements are equivalent to those in this state, they are incidentally teaching massage therapy, or they are providing services in conjunction with disaster relief.

The bill requires persons from other states providing massage therapy at special events to obtain a special events massage therapy permit from the Board of Therapeutic Massage and Bodywork prior to providing services.

The bill also removes the requirement that massage therapists display their license number on advertisements.
