

HB 1415 -- Genetically Engineered Plants and Seeds

Sponsor: Shoemyer (9)

This bill requires the manufacturer or seed dealer of genetically engineered plants, plant parts, or seeds to provide written instructions to producers on how to minimize potential cross contamination. Instructions are to be as inclusive as the United States Department of Agriculture's guidelines and filed with the Missouri Department of Agriculture. Seed dealers and manufacturers are required to maintain certain sales information for a minimum of two years. The required sales information will not be deemed a public record.
