

HB 1606 -- First Responder Training Requirements

Sponsor: Dougherty

This bill allows political subdivisions to provide cardiopulmonary resuscitation (CPR) re-certification for first responders they employ through approved re-certification methods. The re-certification must be conducted by any certified or licensed health care provider, CPR instructor, or a professional rescuer CPR instructor employed by the political subdivision. Approved expenses incurred by a political subdivision are for the costs of re-certification and exclude expenses incurred for the costs of books, supplies, or other items.
