

HJR 31 -- Toll Roads

Sponsor: Harris (23)

This proposed constitutional amendment allows toll roads to be constructed in Missouri. The amendment would allow the Highways and Transportation Commission to conduct feasibility studies for toll facilities and to construct, operate, and maintain toll facilities and toll roads in the state. The commission would be responsible for setting toll rates and collecting tolls. Revenue generated from the toll roads may not be included as part of total state revenue for purposes of the Hancock Amendment.
