

HB 89 -- Telemarketing No-Call List

Sponsor: Pearce

This bill allows residential and business cell phone numbers to be added to the telemarketing No-Call List and changes the definition of "telephone solicitation." Currently, the definition is any voice communication over a telephone line from a live operator for the purpose of encouraging the purchase or rental of goods and services. The bill changes it to any voice, telefacsimile, graphic image, or data communication, including text messaging communications, for the purpose of encouraging the purchase or rental of goods and services.
