

HB 298 -- Telemarketing No-Call List

Sponsor: Wildberger

This bill allows residential and business cell phone numbers to be added to the telemarketing No-Call List and changes the definition of "telephone solicitation." Currently, the definition is any voice communication over a telephone line from a live operator for the purpose of encouraging the purchase or rental of or investment in property, goods, or services. The bill changes it to include for the purpose of endorsing a political candidate, requesting financial support or a vote for a political candidate, or conducting polling regarding a political candidate notwithstanding whether the data obtained from the polling is to be analyzed or discarded.
