

## HB 894 -- Health Care Directives

Sponsor: Sater

This bill requires the Department of Health and Senior Services, beginning January 1, 2006, to make available to the Department of Revenue an informational booklet on the importance of designating a health care proxy or executing a health care directive. The information is to be available to anyone over 18 years of age applying or renewing their license or seeking an instructional permit.

A licensed driver can indicate on their license the existence of a health care proxy or the execution of a health care directive, but is not required to designate a proxy or execute a health care directive at the time of applying. At any time, a valid proxy or directive may be modified or revoked.

The Department of Revenue will not provide legal advice or services to an applicant regarding a health care proxy or directive.
