FISCAL ANALYSIS

ASSUMPTION

According to officials from the **Department of Elementary and Secondary Education (DESE)**, there would be no fiscal impact to their agency. Costs to school districts would depend upon participation and the level at which districts choose to offer incentives. DESE could not estimate the potential cost, but it could be significant.

Officials from the **Columbia School District** stated that the fiscal impact to their district is unknown, but would be part of the Board of Education's annual staff compensation discussion.

In response to the introduced version of this proposal, officials from the **Kansas City, Missouri Public School District** state their district has historically experienced teacher shortages in some subject areas. Providing incentive pay would be an additional cost, but would be beneficial if it results in recruiting teachers who remain with their district longer than the required employment term.

Officials from the **Poplar Bluff School District**, in response to the introduced version of this proposal, state this proposed legislation would not require a school to be financially impacted. However, it could have a financial impact on those schools who opt to participate in the

incentives.

Oversight assumes that even if only a limited number of school districts offered hiring incentives or salary schedule modifications, the fiscal impact could easily exceed \$100,000.

A request for fiscal impact was sent to the **St Louis Public School District, Maryville School District, Springfield School District, among others, who did not respond to a request for fiscal impact.**

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

DESCRIPTION

This proposal gives school districts the right to use hiring incentives and create salary schedule modifications, which can include credit for all prior years of service in another district, to attract and retain teachers. Teachers must be certificated in subject areas that have a demonstrated teacher shortage. Districts can also grant incentives or modifications for teachers with demonstrable or measurable qualities or credentials that are suited to a district's academic needs. Teachers may be required to teach in the district offering the incentive for up to three years.

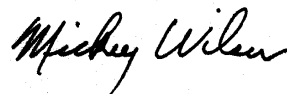

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
