FISCAL ANALYSIS

ASSUMPTION

Officials from the **Department of Elementary and Secondary Education** state this proposal will have no fiscal impact on their agency or on local school districts.

Officials from the **Department of Health and Senior Services (DOHSS)** state this proposal would not be expected to fiscally impact the operations of DOHSS. If a fiscal impact were to result, funds to support the program would be sought through the appropriations process.

Officials from the **Office of Secretary of State (SOS)** assumed the rules, regulations and forms issued by the Department of Health and Senior Services could require as many as 28 pages in the *Code of State Regulations*. For any given rule, roughly half again as many pages are published in the *Missouri Register* as in the Code because cost statements, fiscal notes and the like are not repeated in the Code. These costs are estimated. The estimated cost of a page in the *Missouri Register* is \$23. The estimated cost of a page in the *Code of State Regulations* is \$27. The actual costs could be more or less the SOS's estimated cost of \$1,722 for FY 2007. The impact of this legislation in future years is unknown and depends upon the frequency and length of rules, filed, amended, rescinded or withdrawn.

Oversight assumes the SOS could absorb the costs of printing and distributing regulations related to this proposal. If multiple bills pass which require the printing and distribution of

regulations at substantial costs, the SOS could request funding through the appropriation process. Any decisions to raise fees to defray costs would likely be made in subsequent fiscal years.
