FISCAL ANALYSIS

ASSUMPTION

Officials from the **Department of Natural Resources** assume this proposal would allow the director or the commission to require the filing or posting of a bond as a condition for the issuance of permits for construction of temporary water treatment facilities that utilize innovative wastewater treatment technology. The department would not anticipate any direct fiscal impact.

Officials from the **Department of Health and Senior Services** assume this proposal would not be expected to fiscally impact the operations of the department. If a fiscal impact were to result, funds to support the program would be sought through the appropriations process.

DESCRIPTION

This bill requires those constructing temporary or permanent water treatment facilities using new kinds of wastewater treatment technology to post a bond as a condition for the issuance of a permit from the Clean Water Commission. Traditional and novel wastewater treatment facilities will be subject to the same permit requirements.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
