

HB 1824 -- Contraceptives for Minors

Sponsor: Schaaf

This bill prohibits a licensed health care professional from prescribing or dispensing or a licensed pharmacy from dispensing any contraceptive drug or device to a minor younger than 16 years of age without the consent of the minor's parent. Anyone who violates this provision will be guilty of a class C misdemeanor.

A licensed health care professional, licensed pharmacy, or licensed pharmacist who in good faith believed parental consent was obtained, when in fact it was not, will not be held civilly or criminally liable.
