

HB 1830 -- Secondhand Dealers

Sponsor: Johnson (90)

This bill defines "secondhand dealer," "secondhand goods," and "shop" and requires secondhand dealers to provide a receipt to the seller of secondhand goods, to maintain copies of all transactions, and to obtain certain information relating to the goods and sellers prior to purchasing secondhand or used personal property. A data base will be created and maintained by a third party for the purpose of gathering data on transactions of secondhand dealers and making that information available to authorized agencies.

The bill also contains provisions regarding misappropriated property.
