

HB 1850 -- Statewide Planning and Mapping System

Sponsor: Cooper (158)

This bill requires, subject to appropriation, the State Emergency Management Agency (SEMA) within the Department of Public Safety to establish a statewide planning and mapping system for public buildings in Missouri. The system will be used by response agencies called to an act of terrorism or related emergency. The bill specifies what the system must include and the related duties of state agencies and political subdivisions.

SEMA is required to pursue federal money for the development and operation of the system as well as grants which can be given to state agencies and political subdivisions that participate in the system. State agencies and political subdivisions that participate must submit a progress report to SEMA by July 1 of each year, and SEMA must process the reports and provide the General Assembly with an annual overview by October 1.

Once the system is established, state agencies and political subdivisions must submit initial or final plans for public works projects to SEMA.
