

HB 2032 -- State Adequacy Target for Education

Sponsor: Aull

This bill creates an alternative way of calculating the state adequacy target for school funding. The adequacy target, after its initial calculation, will be the greater of the amount that is based on the expenditures in performance districts, as provided in current law, or the current target amount multiplied by one plus the federal Consumer Price Index percentage growth in the third and fourth previous years.

The bill contains an emergency clause.
