

HB 2105 -- Suicide Records and Documents

Sponsor: Donnelly

This bill makes all records and documents relating to an individual's suicide a closed record. The records and documents will only be available upon request to law enforcement agencies, the immediate family of the suicide victim, or upon any valid court order authorizing disclosure of the records. In any case where a single record or document contains both open and closed records, the agency in custody of the records must make a redacted version available to protect the closed record.
