

## HB 2150 -- Student Transportation

Sponsor: Pearce

This bill specifies the conditions under which it is permissible for a public school district to provide transportation to resident students who do not attend the district's public schools. If transportation can be accomplished without the use of state or additional local funds or capital expense and the parent agrees to pay the actual cost of transporting the student, the local school board may provide the transportation. The bill also specifies how to determine the cost and provides directions for payment. Any district providing this transportation must develop rules to address the seating of non-public-school students and development of bus routes. Local school boards may establish further rules for eligibility.
