

## HB 26 -- Telemarketing No-Call List

Sponsor: Cunningham (86)

This bill expands the No-Call List to include the cell phone and fax numbers of residential subscribers. By January 1, 2008, the Attorney General is required to establish and operate a database of cell phone and fax numbers of residential subscribers who object to receiving unsolicited fax transmissions. Subscribers must notify the Attorney General of their desire to have their fax numbers included on the No-Call List.

The bill also prohibits the use of automatic dialing announcing devices (ADAD) for noncommercial or political purposes. Educational institutions are allowed to use ADAD equipment to contact the parents or guardians of children enrolled in their institution.
