

HCS#2 HB 28 -- CARRIERS OF HOUSEHOLD GOODS

This bill allows a common carrier of household goods to file an application with the Highways and Transportation Commission for the approval of rates to reflect increases and decreases in its operational costs. The application process will be governed by the commission and will follow rules similar to the rate hearing procedures for utility companies.

Beginning January 1, 2008, an intrastate carrier of household goods will be required to obtain Department of Transportation authority to operate in municipalities, between municipalities, and in commercial zones.
