

HB 143 -- Boat Dock Fees

Sponsor:  Salva

This bill requires any private entity licensed to operate a hydroelectric project at the Lake of the Ozarks that charges a boat dock fee based on square footage to calculate the square footage by taking the dock's total square footage minus the square footage of the slip areas of the dock.

Any private entity violating this provision will be liable for three times the amount overpaid to the individual or company being charged the boat dock fee.
