

HB 861 -- Reimbursement for College Remedial Course Costs

Sponsor: Robb

Beginning with the 2008-2009 academic year, this bill allows Missouri high school graduates who are assigned to remedial courses in college to seek tuition reimbursement under the conditions specified in the bill. To be eligible, the student must have been enrolled in the course within three years after high school graduation and the course must be in an academic subject required for high school graduation. The Department of Elementary and Secondary Education will establish rules for students to apply for reimbursement.
