

HB 1039 -- Drug Testing of Construction Employees on School
Property

Sponsor: Schneider

This bill requires any entity providing construction services on the property of a school, college, university, or state-owned building to have a drug and alcohol testing program. Certain requirements that must be included in the program are specified.

An employer who knowingly allows an employee to work on a public project without the specified requirements regarding the testing is subject to a separate fine, imprisonment, or both for each day that the violation continues.
