

HB 1085 -- Noise Ordinances

Sponsor: Smith (14)

This bill exempts wildlife preserves from any criminal liability or a public or private nuisance or trespass action arising out of the sound emission resulting from the normal use of the preserve. Any firearm range or wildlife preserve that must relocate to another site within the same political subdivision due to an eminent domain condemnation proceeding will not be subject to any noise control standard that is more stringent than any in effect at the time the firearm range or wildlife preserve was initially approved for construction.
