

HB 1252 -- Renewable Fuels

Sponsor: Stevenson

This bill removes the exception that if a distributor is unable to obtain fuel ethanol or fuel ethanol-blended gasoline at the same or lower price as unblended gasoline, he or she will not be in violation of the Missouri Renewable Fuel Standard Act. All retail fuel sales after January 1, 2008, must contain 10% ethanol-blended fuel without regard to the market price of regular fuel.
