## **FISCAL ANALYSIS**

### **ASSUMPTION**

Officials from the **Department of Social Services, Department of Public Safety, Office of Administration, Office of Budget and Planning, Office of the Missouri House of Representatives, Office of the Missouri Senate** and the **Department of Insurance, Financial Institutions & Professional Registration** each assume the proposal would have no fiscal impact on their respective agencies.

Officials from the **Department of Mental Health (DMH)** assume that none of the proposed guidelines would result in the need for any additional FTE or cost to the department. It is assumed that the staffing needs of the Department would not be impinged to the point of dramatically affecting the quality of care or services provided to DMH consumers. No fiscal impact.

Officials from the **Office of the Secretary of State (SOS)** state many bills considered by the General Assembly include provisions allowing or requiring agencies to submit rules and regulations to implement the act. The SOS is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. The fiscal impact for this fiscal note to the SOS for Administrative Rules is less than \$2,500. The SOS recognizes that this is a small amount and does not expect that additional funding would be required to meet these costs. However, the SOS also recognizes that many such bills may be passed by the General Assembly in a given year and that collectively the costs may be in excess of what the office can sustain with the core budget. Therefore, the SOS reserves the right to request funding for the cost of supporting administrative rules requirements should the need arise based on a review of the finally approved bills signed by the governor.

**Oversight** assumes the SOS could absorb the costs of printing and distributing regulations related to this proposal. If multiple bills pass which require the printing and distribution of regulations at substantial costs, the SOS could request funding through the appropriation process. Any decisions to raise fees to defray costs would likely be made in subsequent fiscal years.

Officials from the **Department of Health and Senior Services** assume Center for Emergency Response and Terrorism and Division of Regulation and Licensure will play a role in assisting with the development of the guidelines for health care providers and that the assistance can be accomplished with existing staff.
