FISCAL ANALYSIS

ASSUMPTION

Officials at the **Linn State Technical College, Metropolitan Community College, Department of Insurance, Financial Institutions and Professional Registration, Administrative Hearing Commission, Department of Higher Education, Department of Social Service, Department of Elementary and Secondary Education, Department of Revenue, Department of Economic Development, Department of Health and Senior Services, Department of Mental Health, Department of Natural Resources** and the **Lincoln University** assume that there is no fiscal impact from this proposal.

Officials at the **Office of Administration** assume the long range implication of this bill would be possible cost savings to the state by having the ability to use the reverse auction bid process.

Officials at the **Missouri Department of Transportation (MoDOT)** assume the reverse auction procurement methods are currently unknown as a state procurement method, but if used in the most appropriate times, they could result in some savings to MoDOT. Some purchases MoDOT would save money using it; others MoDOT would lose money through that process. The increase of the threshold for purchases for which the agency has to follow competitive bidding process and certain advertising methods for competitive bidding, could potentially save MoDOT in human resources dedicated to conduct the competitive bidding process considering the competitive bidding procedures take longer and involve more paperwork. The amendment of the purchasing recycling laws should have no major fiscal impact on MoDOT, because MoDOT should already be in full compliance with them. The total net fiscal effect is not known.

Officials at the **Department of Conservation** assume this proposal could result in a positive fiscal impact to MDC funds but the amount is unknown.

Officials at the **University of Missouri (UM)** assume this proposal would result in a positive financial impact on UM by further streamlining procurement processes and possibly driving down acquisition costs.

Officials at the **Missouri State University** assume cost to incur the computer software to support the reverse auction process and possible savings from using this process.

Oversight assumes this proposal will result in the savings to General Revenue and savings may be seen by other departments but that savings amount is unknown.

ASSUMPTION (continued)

Officials from the **Office of the Secretary of State (SOS)** state many bills considered by the General Assembly include provisions allowing or requiring agencies to submit rules and regulations to implement the act. The SOS is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. The fiscal impact for this fiscal note to the SOS for Administrative Rules is less than \$2,500. The SOS recognizes that this is a small amount and does not expect that additional funding would be required to meet these costs. However, the SOS also recognizes that many such bills may be passed by the General Assembly in a given year and that collectively the costs may be in excess of what the office can sustain with the core budget. Therefore, the SOS reserves the right to request funding for the cost of supporting administrative rules requirements should the need arise based on a review of the finally approved bills signed by the governor.

Oversight assumes the SOS could absorb the costs of printing and distributing regulations related to this proposal. If multiple bills pass which require the printing and distribution of regulations at substantial costs, the SOS could request funding through the appropriation process.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

This bill allows the Commissioner of the Office of Administration to use the reverse auction procurement method to purchase goods and nonprofessional services if the commissioner believes the method will result in savings to the state. The reverse auction procurement method allows bidders to bid on specified goods or nonprofessional services through real-time electronic bidding. Bidders' prices are revealed, and they have an opportunity to modify their bid prices during the bidding period.

The purchase amount requiring competitive bids is increased from \$3,000 to \$10,000; and the purchase amount requiring advertising is changed from \$25,000 to \$100,000. The bill lists categories that do not require a single feasible source determination.

Obsolete provisions of Chapter 34, RSMo, are repealed.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
