

HB 1690 -- Transmission of Insurance-Related Information

Sponsor: Wilson (130)

This bill allows the Director of the Department of Insurance, Financial Institutions, and Professional Registration to establish rules for submitting required insurance-related filings. The filings must be carried out in a manner consistent with the federal Electronic Signatures in Global and National Commerce Act. Automobile insurers will be allowed to send renewal notices electronically as an alternative to sending the notices by first-class mail unless the insured specifically requests that the notice be sent by mail.
