

## HB 1895 -- Animal-Driven Vehicles

Sponsor: Munzlinger

This bill requires any animal-driven vehicle placed or driven upon or along any state or supplementary highway, whether in motion or at rest, after sunset to one-half hour before sunrise to have reflection tape that meets United States Department of Transportation standards attached at the rear and at the front two corners. The tape must be placed across the entire length of the rear of the vehicle and be visible from at least 500 feet when illuminated by the lower beams of a vehicle's headlight and placed horizontally on the two front corners of the vehicle with the tape on each corner measuring at least 10 inches in length. The Department of Public Safety must establish the specifications for the reflective tape.
