

HB 2145 -- No-Call List

Sponsor: Zimmerman

This bill prohibits telephone solicitations to residential subscribers using wireless phones, faxes, and text messaging unless the calls conform to the current No-call List requirements.

The use of automatic dialing announcing devices for placing calls to residential subscribers on the No-call List is prohibited. If the prohibition is ruled ineffective for any reason, the bill specifies the use of automatic dialing announcing devices. Certain educational information requirements regarding the No-call List by the Attorney General's Office are removed.
