

HB 2349 -- Labor Organizations

Sponsor: Darrough

This bill requires the State Board of Mediation within the Department of Labor and Industrial Relations to investigate a petition filed by a labor organization alleging that a majority of employees in a unit appropriate for collective bargaining wish to be represented by that labor organization. Upon verifying the required signatures or other specified evidence designating a labor organization as their bargaining representative, the board must certify the labor organization as the unit's bargaining representative within 10 days of receipt of the signed petition or other evidence.
