

HB 2353 -- Licensing of Child Care Facilities

Sponsor: Walsh

This bill authorizes the Department of Health and Senior Services to deny, suspend, place on probation, or revoke the license of a child care facility that does not obtain and maintain a license to operate under a local license or permit if required by local law. For facilities that are required to have a local license and the requirements are consistent with but more restrictive than the state licensure requirements, the facility must meet the requirements for local licensure in order to be licensed by the state.
