

HB 2468 -- Missouri Public Service Commission

Sponsor: Schoeller

This bill authorizes the Missouri Public Service Commission to grant approval to exercise any right or privilege under any franchise to existing gas plants, electric plants, water systems, and sewer systems if the commission determines that the approval is necessary or convenient for the public service. Retroactive approval of an existing plant or system will have the same effect as prior approval of the construction of a plant or system under Section 393.170, RSMo.
