

## HB 166 -- Public School Health Screenings

Sponsor: Dusenberg

Beginning in school year 2010-2011, this bill requires public school students enrolled in the second grade and eighth grade to provide proof that they have received a physical examination within the past 12 months. The bill specifies the criteria for the examination and requires the Department of Health and Senior Services, in collaboration with the Missouri State Medical Association and the Missouri Osteopathic Association, to develop a standardized form. Students whose parents or guardians submit written statements in certain circumstances may be exempt from the bill.
