

HB 465 -- No-Call List

Sponsor: Zimmerman

This bill prohibits a caller from using an automatic dialing announcing device (ADAD) unless it is designed and operated to disconnect within 10 seconds after the call is terminated. Telephone solicitations are prohibited to any residential subscriber's wireless phone and includes faxes and text messaging unless the calls conform to the current No-call List requirements.

The use of an ADAD for placing calls to residential subscribers on the No-call List is prohibited. If the prohibition is ruled invalid by a court of competent jurisdiction for any reason, the bill specifies when the use of an ADAD is allowed. Certain educational information requirements regarding the No-call List by the Attorney General's Office are removed.
