

HCS HB 485 -- SEISMIC SAFETY COMMISSION

This bill removes the requirement that one member, but specifies that no more than two, of the Seismic Safety Commission within the Department of Public Safety be appointed from each of the specified professional areas and adds public education to the list of professional areas from which members are to be appointed. The bill also specifies that a quorum will consist of a majority of the appointed members, but not less than seven, and may be met by electronic attendance and the nonvoting participation of the staff of the legislative members of the commission. Currently, a quorum must consist of nine members.
