

HB 653 -- Summer School Attendance Penalty for State School Aid

Sponsor: Schad

Currently, a penalty is subtracted from a school district's state school aid if the district's summer school attendance drops more than 35% from its 2005-2006 summer school attendance. This bill exempts a district from the penalty for school years 2009-2010 through 2011-2012 if its current summer school attendance is at least 65% of its elementary school's average daily attendance for the current year.
