FISCAL ANALYSIS

ASSUMPTION

Section 208.960:

Officials from the **Department of Health and Senior Services** assume the proposal would have no fiscal impact on their agency.

In response to a similar proposal from this year (SB933), officials from the **Department of Social Services-MO HealthNet Division (MHD)** assume the legislation requires chiropractors to be reimbursed under MO HealthNet for providing services currently covered by MO HealthNet and within the scope of chiropractic practice. This legislation will increase utilization of currently paid procedure codes.

Studies that determined the utilization of chiropractic care in the general population were reviewed to determine the potential number of MO HealthNet participants who might receive chiropractic care if this legislation passed. It is assumed that utilization in the MO HealthNet population will be similar to the general population. The National Institutes of Health (May, 2004) found that 7.5% of adults used chiropractic care within the previous 12 months. The Southern Medical Journal (April, 2000) reported that 8.7% of adults used chiropractic care within the previous 12 months. Studies that analyzed usage among children were not readily available. MHD has chosen to use 8% as the estimate of the percentage of the MO HealthNet population that will use chiropractic services.

The number of MHD participants in FY09 was 846,880. It is estimated that 67,750 (846,880 x 8%) participants will utilize chiropractic care.

It is assumed under this legislation chiropractors would, at a minimum, bill for manipulative treatment and certain physical therapies. The cost developed below are for manipulative treatment only and it is assumed additional unknown cost would be incurred for physical therapies. Procedure codes 98925, 98926, 98927, 98928, and 98929 are codes which are currently utilized for osteopathic manipulative treatment. An average rate for these procedure codes is \$29.73.

The number of medically necessary chiropractic visits that will be prior authorized for each participant is not known. For the purpose of the fiscal note it is assumed that a series of 8 visits per year will be authorized. It is possible that some participants will receive more visits and some less. The impact will be Unknown > \$13,428,050 (((67,750 x 8 x \$29.73) / 12) x 10) in the first year (10 months).

SEC:LR:OD (12/02)

ASSUMPTION (continued)

The FY11 total cost will be Unknown > \$13,428,050 (\$4,929,437 GR); FY12 Unknown > \$16,709,865 (\$6,134,192 GR); and FY13 Unknown > \$17,328,130 (\$6,361,157 GR). A 3.7% inflation factor per year was applied.

Oversight notes that states can earn the federal medical assistance percentage (FMAP) on Medicaid program expenditures.

Oversight assumes, because the potential for an increase in utilization is speculative, that the MHD may or may not incur significant costs related to this proposal. Therefore, Oversight assumes, for fiscal note purposes only, an unknown fiscal impact.

FISCAL DESCRIPTION

Section 208.960:

The proposed legislation requires chiropractors to be reimbursed under MO HealthNet for providing services currently covered under the MO HealthNet program and that are within the scope of chiropractic practice.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
