

HB 1364 -- MO HealthNet Program Benefits

Sponsor: Davis

Beginning January 1, 2011, this bill prohibits payment under the MO HealthNet Program to any licensed physician, dentist, or podiatrist for any drug prescribed to treat a sexual dysfunction, impotence, or infertility.

Currently, subject to appropriations, only prescribed medically necessary dental services are covered under the program. The bill changes the coverage so that all dental services, including dentures, will be a covered expense.
