

HB 2067 -- Reporting of Student Enrollment Information

Sponsor: Morris

This bill requires each public school district, charter school, private school, and parochial school to report the number and age of each student enrolled and the number of students in each grade level to the Department of Elementary and Secondary Education at the beginning and at the end of each school year. Year-round schools must report twice annually as directed by the department, and the department may specify a format for the submission of the information. Any person responsible for a child enrolled in a home school must report the enrollment to the chief school officer of the child's district of residence but does not need to provide the name of the child or any other identifying information.
