

# HB 2135 -- Student Participation in Interscholastic Activities

Sponsor: Webb

This bill prohibits any middle, junior high, or high school student enrolled in a public school who has received a failing grade in any course from participating in an interscholastic activity for the report card grading period following the failing grade. Participation in activities may be resumed if the student receives passing grades in all courses in the report card grading period that immediately follows. The bill supersedes any law, school or school district policy, or any eligibility standards issued by the Missouri State High School Activities Association.
