

HJR 99 -- State Road Fund

Sponsor: Leara

Currently, all funds collected from highway users are deposited into the State Road Fund to be expended by the Highways and Transportation Commission without any required legislative action less the actual costs of collection of the Department of Revenue; the actual cost of refunds for overpayments and erroneous payments of the taxes and fees and maintaining retirement programs as permitted by law; and the actual cost of the State Highway Patrol in administering and enforcing state motor vehicle laws and traffic regulations. Upon voter approval, this proposed constitutional amendment requires these costs with the addition of all nonhighway-related administrative expenses of the Department of Transportation to be subject to appropriation by the General Assembly.
