

HB 552 -- Standard of Care for Bleeding Disorders

Sponsor: Molendorp

This bill establishes the standard of care for persons with bleeding disorders and requires the State Board of Pharmacy within the Department of Insurance, Financial Institutions and Professional Registration to establish rules governing the standard of care. Blood clotting product-related services are added to the list of services which are to be paid under MO HealthNet benefits; and pharmacies must dispense all prescriptions of blood clotting products as written by the prescribing physician but may substitute another product if the prescribed product is not in stock in the case of an emergency.
