FISCAL ANALYSIS

ASSUMPTION

Officials from the **Office of State Courts Administrator, Department of Insurance, Financial Institutions, and Professional Registration, Department of Health and Senior Services, Department of Labor and Industrial Relations, Missouri Department of Transportation, Missouri Consolidated Health Care Plan, Missouri Department of Conservation, Harrison County Health Department, Tri-County Health Department and Missouri State University** assume the proposal will have no fiscal impact on their organization.

Officials from the **Department of Public Safety - Missouri State Highway Patrol** defer to the Missouri Department of Transportation for response regarding the potential fiscal impact of this proposal on their organization.

Officials from the **Department of Higher Education (DHE)** state the proposal would have no direct, foreseeable fiscal impact on the DHE.

Officials from the **Office of Attorney General** assume any potential costs arising from this proposal can be absorbed with existing resources.

Officials from the **Office of Prosecution Services (OPS)** assume the proposal will have no measurable fiscal impact on the OPS.

Officials from the **Department of Social Services (DSS)** state in the provider participation section of the fee-for-service provider manuals, a MO HealthNet provider must comply with all laws, policies, and regulations of Missouri and the federal government. It further states that a provider must also comply with the standards and ethics of his or her business or profession to qualify as a participant in the program.

The Managed Care contracts include language which prohibits the health plan from requiring a provider to perform a service contrary to the provider's conscience and allows the provider to make a referral to another health care provider licensed to provide the appropriate care. Therefore, there is no fiscal impact to MO HealthNet or the DSS.

Officials from the **Office of Administration (OA) Risk Management, General Services Division (RM/GS)** provide the following assumptions:

191.1153.3

If a state employee discriminates against any medical professional under this section, then there would be a potential cost to the Legal Expense Fund.

ASSUMPTION (continued)

191.1153.4

If a state employee refused a board certification demotion, loss of career specialty, reduction of wages or benefits, refusal to award any grant, contract or other program, refusal to provide residency training opportunities, or any other penalty, disciplinary, or retaliatory action, then there is a potential cost to the State Legal Expense Fund.

191.1156.4

If a state employee denies any form of aid, assistance, grants, or benefits and discriminates against any person, association, corporation, or other entity attempting to establish a new health care institution or operating an existing health care institution because the existing or proposed health care institution declines to participate in medical services contrary to the health care institution's conscience, then there is a potential cost to the State Legal Expense Fund.

191.1159.2

If a state employee is in violation of the above, then civil action may be pursued and the aggrieved party shall be entitled to recover threefold the actual damages, including pain and suffering and reasonable attorney fees. Recovery will not be less than \$5,000 for each violation in addition to costs of action and reasonable attorney fees.

RM/GS officials assume the proposal would result in unknown costs to the General Revenue/State Legal Expense Fund.

Oversight assumes the potential for civil action to be speculative and absorbable within current funding levels of the General Revenue/State Legal Expense Fund.

Officials from the **Department of Mental Health (DMH)** state the authority to bring a cause of action against the DMH for imposing standards regarding treatment, responses to emergencies, and otherwise, could increase litigation exponentially. Therefore, the fiscal impact of this proposal is an unknown cost.

Oversight assumes the potential for civil action to be speculative and absorbable within current funding levels of the General Revenue/State Legal Expense Fund.

Officials from the **University of Missouri** state that no fiscal impact for this proposal can be calculated at this time. Officials are not aware of any instances in which the University has taken actions that would violate the terms of the legislation as presently drafted. Nonetheless, creating

ASSUMPTION (continued)

a cause of action for health care providers that does not presently exist could expose the University to defense and liability costs in the event that a health care workers brings an action against the University or its officials under the statute. However, it is not possible to determine the likelihood of such actions or the amount of such defense or potential liability costs at this time.

Oversight assumes the potential for civil action to be speculative and, for fiscal note purposes, is not presenting a cost.

In response to an earlier version of this proposal, officials from the **Missouri Southern State University** assumed the proposal would have no fiscal impact on their organization.

Officials from **Truman State University** did not respond to **Oversight's** request for a statement of fiscal impact.

No hospitals responded to **Oversight's** request for a statement of fiscal impact.

No other local public health department responded to **Oversight's** request for a statement of fiscal impact.

<u>FISCAL IMPACT - State Government</u>	FY 2013 (10 Mo.)	FY 2014	FY 2015

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

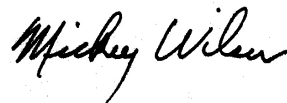

The proposed legislation appears to have no fiscal impact.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
