

HB 400 -- ADMINISTRATION OF ABORTION-INDUCING DRUGS AND CHEMICALS

This bill requires the administration of the initial dose of RU-486 (mifepristone) or any other abortion-inducing drug or chemical to occur in the same room and in the physical presence of the physician who prescribed, dispensed, or otherwise provided the drug or chemical to the patient. The physician or a person acting on the physician's behalf must make all reasonable efforts to ensure that the patient returns after the administration or use of any abortion-inducing drug or chemical for a follow-up visit unless the termination of the pregnancy has already been confirmed and the patient's medical condition has been assessed by a licensed physician prior to discharge.
