

HB 2079 -- SEWER AND WATER SERVICE

SPONSOR: Funderburk

This bill allows specified sewer service providers to contract with municipalities and water districts established under Chapter 247 for termination of water service to the customers of the municipality or water district in cases of nonpayment of sewer bills. The requirements for contracting and termination of service are identical to those currently allowed in Section 393.015 that apply to agreements between sewer service providers and a water corporation.
