

HB 798 -- SCHOOL DISTRICT ACCOUNTABILITY

SPONSOR: Sommer

This bill requires every school district and charter school to maintain an accountability portal for the public. By September 1, 2016 each public school district and charter school must develop, maintain, and make available all publicly available budget, income, expenditure, and disbursement information for the current fiscal year. The school district or charter school must update the data on the portal quarterly. The data must remain available for at least 10 years.

Additionally, the bill requires, by January 1, 2016, that the Department of Elementary and Secondary Education (DESE) must create a template for voluntary use by any school district needing assistance in developing an accountability portal. In the event that a school district or charter school does not maintain a website, the information must be maintained through DESE.
